Women Business Owners meet online to develop a million dollar action plan

3 Day Virtual event brings Women Business Owners from all over the world together to solve business dilemmas.

Colton, CA – On April 27, 2007, Women Business Owners declare their intention to become a million dollar company in 5 years or less at the Walk the Walk for Financial Freedom Growth Summit. Experts in the fields of marketing, PR, Sales, and Cash Flow will teach success strategies designed to accelerate business growth.

What makes the Growth Summit different from other conferences is that women don't need to leave home. They actively participate live and in real time virtually from the comfort of their own home.

“Less than 5% of women business owners generate a million dollars in revenue,” said Cynthia Renee Frazier, Co-Founder of the Energy Tour Cafe and sponsor of the Growth Summit. “Using technology to its fullest will go a long way to closing that gap,” she continued.

Being online offers all of the elements of a traditional conference—exhibits, keynote speakers, break out sessions and power networking. Women Business Owners in the US, Canada, the UK, Jamaica, France, Australia, Italy, Belgium, and the Netherlands will come together to talk about business growth and their desire to make a difference in the world. The Growth Summit is expected to raise \$5,000 to be shared by four charities—The Pajama Program—new pajamas and books for displaced children, Women For Women International—support to women in war torn regions, Red Campaign in honor of Emily Perez—killed in Iraq, was the first female minority Command Sergeant in the history of the US Military academy at West Point, and Radio Al-Mahama—the only female radio station in Iraq.

According to statistics, 74% of all millionaires in America became millionaires through entrepreneurship. A new millionaire is created every 58 hours. 73% of women business owners, compared to 60% men, who generate a million dollars in revenue, started their company from scratch rather than inherit or purchase an existing business.
